FEATURES:

The Model S1505 has many important features, such as a direct spark electronic ignition for dependable start-up and an air sensing switch that allows for safe shutdown should the airflow be blocked. A thermostat cycles the heater from high fire to low fire, realizing more savings on fuel and electricity. A red indicator light shows when the gas valves are open. This unit has been designed for unattended operation. It is also equipped with carrying bars, lifting loop and has two 6" wheels for easy mobility by one person. A supply voltage meter indicates proper voltage before the heater is started. A single lever allows for the immediate changeover for propane or natural gas.

SAFETY FEATURES:

- GAS PRESSURE SWITCH
- AIRFLOW SWITCH
- HIGH TEMPERATURE LIMIT SWITCH
